

IN-CEILING

AVAILABLE FABRICS:

- Matt white with black back
- Matt white with white back
- Rear
- High contrast white and grey
- Micro perforated

FABRIC EXIT FROM CASING: Standard the In-Ceiling screen has its screen fabric fall from the front. This way you can install the screen to a wall or ceiling and still have the screen fabric in front of a flatscreen or painting on the wall.

MOTOR: Installation of the motor is standard on the right side of the screen (when looking at the front of the screen).

A cable will run from the back of the casing.

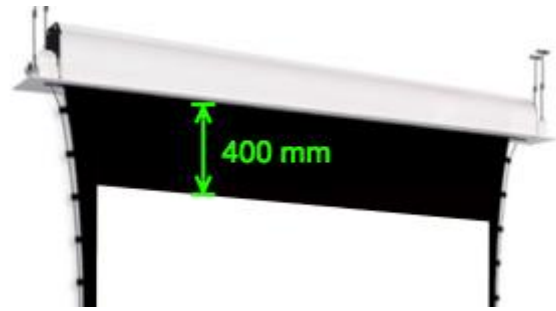

The standard installed motor (230V) has 4 wires; common, ground, up and down. A wall switch is included. The available control options only work with the standard motor.

The optional RTS motor, which has an internal RF receiver (RF remote included) has 3 wires; ground, up and down. Power plug not included.

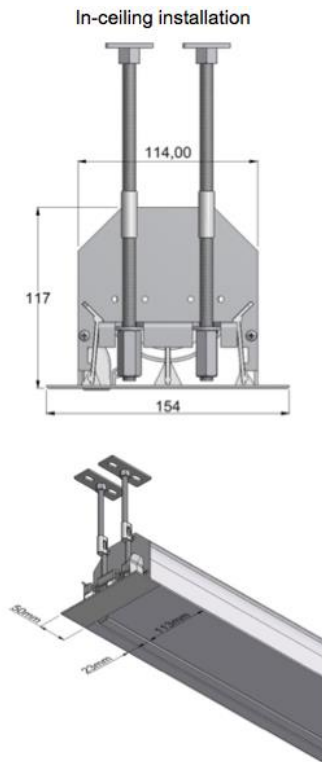

WARRANTY: The screen has a 24 months warranty. The Somfy motor has a 36 months warranty.
